# Team Members:

Josh Thomas (10)

Yong Zheng (12)

Task Objective:

Create a circuit board with Arduino to turn the LED lights on/off based on the following rules:

1. Green light on
2. As the button got pressed, both two red lights will start to blink with 250ms wait.

For bonus:

1. Green light on
2. As the button got pressed, it will simulate the traffic light with 250ms wait.
